

ENVIRONMENTAL POLICY

The Enterprise Port Terminal supports core environmental goals as a means of conducting operations in a manner that achieves a high standard of environmental stewardship, and protects the health and safety of its employees, contractors, and surrounding communities.

In accordance with these goals, the corporate policy is:

1. To operate all activities in a manner consistent with safety and health considerations and environmental stewardship.
2. To establish and maintain corporate controls to ensure that the Company's policy is being properly implemented and maintained.
3. To continually improve management of environmental aspects at the terminal and to work with government and industry to improve public policies and practices supportive of environmental quality, particularly with respect to the handling and transportation of sulphur, glycol, canola oil and potash.
4. To comply with all applicable environmental laws and regulations as well as take into consideration the environmental requirements of customers.
5. To operate the Company's facilities in a manner which is responsive to the needs of its workers, contractors, and the community to achieve high standards of environmental stewardship.
6. To develop and implement environmental training programs, as necessary, to ensure that employees are aware of their responsibilities with respect to environmental protection and to increase their environmental awareness.
7. To require, where possible, shippers and contractors incorporate all prudent measures as may be reasonably and economically necessary to reduce the potential environmental impact of sulphur, glycol and other products handled in the Port and at its facilities.
8. To respond immediately to emergencies to protect employees, the public and the environment.
9. To strongly encourage, and where possible require, all contractors to have a formal environmental policy that has as its principal objective environmental stewardship.
